

March 30, 2015

TOPIC: FULL SERVICE PARTNERSHIP (FSP) DISENROLLMENT, INACTIVE STATUS AND TRANSFERS

DO

Create a new SRTS record to **transfer** an enrolled FSP client to another FSP provider.

DO NOT

Create a new SRTS record to **disenroll or inactivate** an enrolled FSP client.

SRTS Tip for FSP: What started on paper stays on paper, with the exception of *transfers*.

Initiating a disenrollment or inactive status request in the SRTS can only occur if the client was authorized via SRTS. The existing record is then transferred with the appropriate transfer reason.

⇒ See SRTS Workflows for additional information.
